Construction News

July 15, 2008

The Dam at Lake Hiawatha will be closed to all traffic, including golf carts, starting today. It will remain fully closed until all site related work is completed. We anticipate the paving to commence on Thursday the 17th. After that there will be additional work on the site that must be completed and there will be some cure time for the new asphalt.

Once all site work is completed the Dam will be available for passage only during the normal hours of operation by maintenance personnel. Those wishing to use the Dam should use extreme caution as this passageway will be the main artery for maintenance equipment and materials.

The old boat launch ramp has been abandoned and a new site will be built just below the Hiawatha. Also please note that once the Dam is opened there will be no parking at any time on the Dam or at the site of the old boat launch ramp.

The after hours closing of the Dam is part of the security arraignment for the new maintenance Facility. Also the closing during off hours will greatly enhance our liability protection.

Apologies for the late notice. It just got lost in the hustle bustle of final preparations.
