Volume 2008-31 10/17/08

Attention All POA Members

On the afternoon of Thursday, October 16, 2008 it became necessary to close the indoor pool. This action was deemed necessary due to complaints from users of the pool experiencing a "burning" sensation. Last Sunday the pool was closed due to similar complaints. On Monday we partially drained and refilled the with fresh water and disconnected the automatic chlorinator to eliminate variables. No additional chlorine has been added by authorized personnel since last Friday .

Since we have been unable to identify the root cause for the discomfort some swimmers are experiencing, it is only prudent to close the pool, completely drain and refill the pool and start from scratch. I wish we could tell you when the pool will reopen, but it will not reopen until we are confident that everyone using the pool can do it comfortably. We expect that it will take at least 7 days to get the pool operational and longer if the test parameters are not met or fluctuate.
